Mac Mail Email Setup

In this tutorial we will be guiding you through the process of configuring email on Mac Mail. We are using Mac Mail Version 10.2 on OS X. If you are using a different version or operating system, these instructions may differ.

How do I find my email cluster?

In order to setup your email client, you will need to know which email cluster your account is hosted on. If you don't know this information, you can check with your email service provider, or try logging into webmail at:

http://mail.b.hostedemail.com

If you are able to successfully login to the webmail interface, then you have found your mail cluster. If you are not able to login to either cluster, please contact your email service provider for support.

Step 1: Add Account

Launch Mac Mail, click on Mail and then select Add Account.

Step 2: Select Account Type

Choose a mail account to add
o 🦲 iCloud
🔿 🖪 Exchange
○ Google [*]
○ YAHOO!
• Aol.
Add Other Mail Account
? Cancel Continue
