Windows 10 Mail Configuration

This guide explains how to configure your Windows 10 Mail client to access your email account. This tutorial was created using version 17 of Windows 10 Mail. If you are using a different version, these instructions may differ.

How do I find my email cluster?

In order to setup your email client, you will need to know which email cluster your account is hosted on. If you don't know this information, you can check with your email service provider, or try logging into webmail at:

http://mail.b.hostedemail.com

If you are able to successfully login to the webmail interface, then you have found your mail cluster. If you are not able to login to either cluster, please contact your email service provider for support.

Step 1: Open the Mail application

Click Add Account

Step 2: Select Account Type

Windows 10 Mail Configuration

Add an a	ccount		×
Choose an account			
E	Exchange Exchange, Office 365		
G	Google		
	Yahoo!		
	iCloud		
	Other account POP, IMAP		
≎	Advanced setup		
		Close	

Select Other Account

Step 3: Enter Account Details

Add an account				
Other account				
Email address				
user@example.com				
Send your messages using this name				
Example User				
Password				
•••••				
We'll save this information, so you don't have to sign in every time.				
Cancel	Sign in			

Enter your mailbox username, display name, and password. Then click Sign In

Step 4: Enter Advanced Account Information

Add an account	;	<		
Internet email account				
Email address				
user@example.com		I		
liser name				
Example User		I		
Examples: kevinc, kevinc@contoso.com, domain\kevinc				
Password				
••••••		I		
Account name		I		
Send your messages using this name		1		
Example User				
Incoming email server				
mail.hostedemail.com				
Account type				
IMAP4	~	I		
Outgoing (SMTP) email server				
mail.hostedemail.com		1		
Outgoing server requires authentication				
✓ Use the same user name and password for sending email				
Require SSL for incoming email				
Require SSL for outgoing email				
Cancel	Sign in			
Curici	Jigh in			

If Windows is unable to automatically detect the correct connection settings, you may be required to enter advanced account settings. You may enter the above information.

The mailbox is now configured for access in Windows 10 Mail.
